Intention of future whaling by Korea in subareas 5 and 6

YONG-ROCK AN, DAE-YEON MOON AND SEOK-GWAN CHOI
Cetacean Research Institute, National Fisheries Research & Development Institute

- The land-base whaling will be conducted by small-type coastal catcher boats.
- Operation will be restricted in subareas 5 and 6 (Fig. 1).
- Whaling season will be from March to November.
- J-stock minke whales will be targeted.
- The operation of the boats will be performed 60 nautical miles off the coast in the subarea 5 and 30 nautical miles in the subarea 6.
