

LIST OF STRANDING NETWORKS – 2011 (as at 13 April 2011)
(EMERGENCY NUMBERS FOR LIVE STRANDINGS AND DEAD CETACEANS FOUND ASHORE/OFFSHORE)

(Supplemental information added by the Secretariat from information provided by Contracting Governments and/or members of the Scientific Committee in response to Circular Communication IWC.ALL.159 is shown in **bold**)

The following list has been compiled using a list provided by Fabian Ritter (Belgian representative on the SSWG) supplemented with information that the Secretariat obtained from National Progress Reports of Contracting Governments. This list was circulated to Contracting Governments and members of the Scientific Committee in February 2007 (Circular Communication IWC.ALL.106), May 2010 (Circular Communication IWC.ALL.149 and subsequent email of June 7) and February 2011 (Circular Communication IWC.ALL.159), inviting them to: (1) update the information for their country, as appropriate; and (2) provide information relevant to stranding networks of non-member countries, if known. The intention of this exercise is to obtain as comprehensive a list as possible of known stranding networks and contact persons. The next step required is for the Scientific Committee and SSWG to discuss the most appropriate way to gather more information including the spatial and temporal coverage of any networks and the type of information collected when a stranding is reported.
